Bank of Ireland showcases its Specialist Deposits products

Bank of Ireland Business Banking GB have been showcasing their product offerings to a range of sectors this autumn at a series of events designed to provide networking opportunities with key contacts and to generate new and consolidate old relationships.

Charity Finance Live, a conference and exhibition held in London in October, aimed to provide Charity Financial Directors with the tools to manage successfully through these times of substantial change.

The Association of Chief Executives of Voluntary Organisations (**ACEVO**) held a National Conference in London and a regional conference focused specifically for leaders for health and social care (HSC) organisations. Both gave members the opportunity to catch up on the latest third sector news, research and policy.

National Association of Local Councils (**NALC**) who represents the interests of local (town and parish) councils in England held it's Larger Local Council Conference in London, where with the Local Democracy, Economic Development and Construction Act now passed, and a climate of public spending cuts at national and local level, delegates discussed their crucial role in developing their local places.
